## Director's Note

---

Three weeks ago, we had a COVID scare that put us online. We decided to reconfigure our concept and steer into the zoom world that we have found ourselves in over the last year. What you are all seeing is not only the product of a grand idea and two full years of work, but also a few weeks of frantic reconfiguration, hard work from our cast and crew, and artists' resilience.

Two years ago we decided we wanted to try to do a fully student run production our senior year. We went through the process of selecting a show, getting the approval from Stage 2 Productions, and submitting a proposal to the performing arts faculty. We could not have imagined, when we started this journey, what the world would look like today or what we'd have to do and learn in order to continue working on our craft.

After hours of conversation with our design team at production meetings and late nights at the kitchen island of our apartment, we landed on a concept we're proud of. The show you are watching is the team getting ready for games. They have found themselves coping with the pandemic and being forced to warm up in separate rooms the same way many of us have over zoom calls. Parts of this story are told over video call or over the chat feature.

This production of the Wolves is the culmination of our college journey. One we have gotten to take with our best friends, amazing mentors, and an incredible group of artists. It has been an awesome journey and we are proud that this is our last show here at NSU. Thank you so much to Stage 2 Productions, Dan, Calypso, our cast, crew, and designers, and all of you for supporting us

- Darby (Director) and Mia (Stage/Production Manager)
