Consult Graduate Catalog for detailed information about dissertation credit requirements.

## Hybrid Course and Electives Information Guide

### **CARM/D 6660 Conflict Management in Groups: Overt and Covert Dynamics - Dr. Neil Katz**

The purpose of this unique course is to provide participants with knowledge skills and attitudes to be effective in groups with an emphasis on analyzing and managing a variety of tasks in different settings. The course examines issues of communication, leadership, power and authority in relation to group and interpersonal effectiveness and enables participants to better understand and cope with complex challenges as they emerge in the natural life of groups and organizations. Insights into overt and covert dynamics are generated through direct experience in a temporary living laboratory where members can experience and explore group life as it occurs. A team of approximately 6 trained and experienced faculty and consultants manage the event.

**Mandatory attendance at the Davie campus is required for 3 days** for the residential part of the hybrid course (Saturday-Monday Feb.1-3). For participants expecting graduate school credit, limited participation on Canvas Discussion Board will continue throughout the term. If zoom sessions are requested, they will be offered on a voluntary basis.

For more information and for testimonials from previous attendees, please email Prof. Katz at [kneil@nova.edu](mailto:kneil@nova.edu).

### **CARM/D 6600 Special Topics: Gender, Society and Culture – Dr. Cheryl Duckworth**

GRADUATE STUDENTS: this is an innovative course in Gender, Society and Culture that explores the role of gender in various societies, and related conflicts that arise. It is open to undergraduate and graduate students alike. The course includes a required weekly Zoom session Tuesday night from 7:30 to 8:30 Eastern, as well as asynchronous activities. "

### **CARM/D 6602: Resolving Environmental Conflicts and Public Disputes – Dr. Elena Bastidas**

*Resolving Environmental Conflicts and Public Disputes* offers an invaluable opportunity to understand and address some of the most pressing environmental challenges of our time, including resource scarcity, climate impacts, and conservation issues. The course also addresses more broadly public disputes and equips students with practical skills in negotiation and conflict resolution with stakeholders' groups—such as government agencies, community organizations, businesses, and the public—over issues of public policy, resource allocation, or social values. The course fosters interdisciplinary thinking using real-world case studies, where students can apply theory to practice while building a network with peers and professionals committed to conflict transformation and sustainable development. Ultimately, this course equips students with the tools needed for careers in environmental conflict management.
